HEEL GUARDS

Wearing a pair of climbers, whether on a pole, or walking from the truck to the structure, exposes the lineman's ankle and Achilles tendon to injury from the razor sharp tips of the gaff. Gaff guards offer some protection, but can't help on a pole. The Harko Heel Guard protects this vulnerable area, without restricting movement. They are light, durable, and easily attached to any standard climber.

BHG-M	Medium Heel Guard	.5 lb.
