**FS1500 Series**  
[FS1500]

Fiberglass Stepladder with 300 work load capacity, with Da Boot.

Da Boot.- Polypropylene copolymer upper boot provides strength, durability and fiberglass rail surface protection. Thick non-marring thermoplastic elastomer tread is bonded and mechanically fastened to the upper boot and provides a slip resistant footing.

Non-conductive structural molded top with hardware tray, paint can holder, handyman's tool slots, pipe holder, curved front of top provides leg comfort and convenient magnet to secure small steel parts.

Inside Spreader Braces.-Spreader braces inside fiberglass rails help keep braces from getting hooked or abused in transit.

Double Rivet Step Construction.- Each step secured with six, large headed, semi tubular steel rivets for maximum strength, 30% greater shear strength than solid aluminum rivets.

Wide Back Braces.- Vertically mounted U-shaped back braces spaced on one foot intervals provide maximum stiffness and discourage unsafe climbing.

Full channel Fiberglass Rail.-Nonconductive full channel rails are covered with a polyester veil for years of durable service without fiber prominence of blooming.

The ladder meets or exceeds the safety standards set by ANSI (American National Standards Institute) and OSHA (Occupational Safety and Health Administration).

300 lb, work load capacity ( Includes weight of user and tools).
